

Newsletter | July-August 2024

*Agroecology in Action Newsletter* is a bi-monthly bulletin published by PAN Asia Pacific that highlights the grassroots work of International People's Agroecology Movements' (IPAM) field learning sites to promote agroecology as a sustainable approach to agriculture and food production and development, in the framework of food sovereignty, ecological and social justice.

## GMOs: Paying Lip Service to Serving Lives

The question of safety has long hounded GM food, and exposes the hypocrisy that for all its claims of being in the service of humanity, it's about instrumentalizing life as a testing ground for experiments. And for all its posturing as being cutting edge and state of the art, the genetic modification of food is upheld by an outdated centuries-old imperialist worldview.

## Stories

### **A Taste of Freedom through Agroecology**

IPAM visits the PATIKIM Festival in Quezon Province, Philippines, to join farmers and eaters in celebrating local biodiversity and the many freedoms we enjoy through agroecology. Read about the celebration here. [Read more](#)

Resources

### **Beekeeping in Uganda**

Bees provide us with critical pollination and ecosystem services that ensure our food. In this brief introductory video, Jimmy Kalule, a trainer at IPAM field learning site St. Jude Family Projects, discusses their practice and experience of keeping bees. [Read more](#)

## Announcements

**[WEBINAR] The Future is Now: Resilience and Sovereignty  
through People-led Agroecology**

# The Future is Now: Resilience and Sovereignty through People-led Agroecology

EPISODE 1: INDIGENOUS, INNOVATIVE: AGROECOLOGY AS A CLIMATE SOLUTION

Pavel Partha  
BARCIK  
Bangladesh

Georie Pitong

The corporate food system is hijacking the future of food and farming by confining it to profit-centric productivism and proprietary technology innovations. The IPAM learning exchange series resists this narrow vision and shows that **agroecology is the future of food and farming**, and it is a future that is **already being prefigured on the ground by peasant farmers, civil society organizations, and people's movements**, many of whom are members of the IPAM network. The future of the food system that we want is being built now.
